RULES FOR HORTICULTURAL EXHIBITS

Entries

1. Entries will be received on Wednesday, April 15, 2026 from 3:00-5:00 p.m. and Thursday, April 16 from 8:00-10:15 a.m. Exhibitors must be off the floor by 10:30 a.m. **This rule will be strictly enforced.** Help will be available for identification and grooming.
2. Entry cards for the exhibits will be available at the show, or may be obtained in advance from the committee chairmen. **Both sections of the card must be filled in.**
3. Entries, awards, and ribbons must be removed between 8:30-10:00 a.m. on Friday, April 17.
4. All classes are open to anyone who grows daffodils except where specified otherwise.
5. Any information on any entry tag, including the exhibitor's number, which could compromise the anonymity of the exhibitor must be concealed during the judging.
6. An exhibitor may make as many entries as desired in any class, provided each entry is a different cultivar or species or an entirely different collection of cultivars and/or species.
7. All blooms in the Horticultural Division must have been grown in the open by the exhibitor. Miniatures may be grown in a protected area.
8. Wedging material and containers for cut flower exhibits will be furnished by the show committee. No daffodil foliage is permitted.
9. All collections of five or more stems must be exhibited with each cultivar or species in a separate container.

Labeling

10. Each cultivar or species must be correctly labeled with name and division. Originator's name must appear on the label in American-bred classes, except seedlings shown by the originator.
11. Exhibits which are not named, or are incorrectly named, will not be judged. Correct classification and labeling shall be the responsibility of the exhibitor.
12. No label may be changed, specimen added, removed, altered, or substituted after the judging has begun, or after an award has been placed.

Intermediates, Miniatures and Seedlings

13. An intermediate Daffodil is a standard Daffodil in divisions 1,2,3,4 or 11 having a single floret whose diameter is typically between 1.5" and 3". (50mm through 80mm) Intermediate Daffodils may be entered in classes for standard Daffodils as well as classes reserved for intermediate Daffodils.

14. Miniature daffodils may be shown only in classes for miniatures. A guideline when entering or judging miniatures is that a single-floreted cultivar normally possesses a flower less than 50mm (1.97") in natural spread. For a multi-floreted miniature daffodil, the guideline measurement for the floral mass is 72mm (2.83") in natural spread. The judges may penalize any exhibit exceeding these measurements at the time of judging or decline to judge them as they find appropriate. Any named, numbered, or species daffodil which appears graceful, with all parts proportionally small, may be exhibited in the Miniature Classes, and is eligible for all ADS Miniature awards, except that only numbered seedlings shown by the originator shall be eligible for the ADS Miniature Rose Ribbon.
15. Blooms of seedlings may be exhibited in all classes for named cultivars. **All seedlings must be identified by a number designation** assigned by the originator. If the exhibitor is not the originator, the name of the originator must be included as part of the identification.

Awards

16. Each stem in an exhibit of cut flowers receiving an ADS Award must score 90 or more on the appropriate ADS Scale of Points.
17. Only one first, one second, and one third award may be given in each class. Honorable mention awards may also be given, if merited, but only if first, second, and third have been awarded. First, second, third, and honorable mention awards may be withheld by judges if, in their opinion, the exhibit is not worthy. If a blue ribbon (first place) has been awarded in a class eligible for an ADS ribbon, the ADS Award may not be withheld.
18. The decision of the judges is final. If an error is discovered in an exhibit after completion of judging, any award placed thereon (ADS, Special, or Ribbon) shall be forfeited by the exhibitor. If an error is discovered before the judging is completed, the class must be rejudged.

Miscellaneous

19. The Show Committee reserves the right to subdivide classes by cultivar or color code when there are three or more worthy exhibits of the same cultivar or color code, and if a sufficient number of worthy exhibits are left in the class. Species may be subdivided by their botanical sections.
20. The Royal Horticultural Society System of Classification will be used. The labeling authority is *Daffodils to Show and Grow*, as amended each year in the December *ADS Daffodil Journal*, supplemented by Daffseek.org.

ROYAL HORTICULTURAL SOCIETY SYSTEM OF CLASSIFICATION

For garden purposes, daffodils are classified in twelve divisions. Division number indicates form, while letters indicate color. For example, 2Y-YYO is a large-cupped daffodil, all yellow except for an orange rim; 1 W-Y is a trumpet daffodil with white perianth (petals) and yellow corona (trumpet).

Division 1 Trumpet Daffodils

One flower to a stem; corona (trumpet or cup) as long as, or longer than, the perianth segments (petals).

Division 2 Large Cup Daffodils

One flower to a stem; corona more than one-third, but less than equal to, the length of the perianth segments.

Division 3 Short Cup Daffodils

One flower to a stem; corona not more than one-third the length of the perianth segments.

Division 4 Double Daffodils

Flowers have a clustered cup and/or corona; one or more flowers to a stem.

Division 5 Triandrus Daffodils

Characteristics of *N. triandrus* clearly evident: usually more than one flower to a stem; head drooping; perianth segments often reflexed and of a silky nature.

Division 6 Cyclamineus Daffodils

Characteristics of *N. cyclamineus* clearly evident: one flower to a stem; perianth segments significantly reflexed; corona straight and narrow; flower at an acute angle to the stem, with a very short pedicel (neck). Some exceptions.

Division 7 — Jonquilla and Apodanthus Daffodils

Characteristics of Sections Jonquilli or Apodanthi clearly evident: one to five flowers to a stem; perianth segments spreading or reflexed; corona cup-shaped, funnel-shaped or flared, usually wider than long; flowers usually fragrant.

Division 8 — Tazetta Daffodils

Characteristics of Section Tasettae clearly evident; perianth segments rounded and often somewhat crinkled; sweet scented and very short cupped.

Division 9 — Poeticus Daffodils

Characteristics of the *N. poeticus* group: usually one flower to a stem; perianth segments pure white but sometimes stained with the corona color at the base; small flat corona with a green or yellow center edged with red; fragrant.

Division 10 — Bulbocodium Daffodils

Characteristics of Section Bulbocodium clearly evident: small flowers resemble a "hoop petticoat" form, usually one flower to a stem; perianth segments insignificant compared with corona; filament and style are usually curved.

Division 11 — Split-Corona Daffodils

Corona split, usually for more than half its length.

a) Collar Daffodils: Split-corona daffodils with the corona segments opposite the perianth segments; the corona segments usually in two whorls of three.

b) Papillon Daffodils: Split-corona daffodils with the corona segments alternate to the perianth segments; the corona segments usually in a single whorl of six.

Division 12 — Other Cultivars

Daffodils not falling into any of the previous categories.

Division 13

Daffodils Distinguished Solely by Botanical Name

All species and reputedly wild forms, variants and hybrids.
